DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 and 7-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Aoki et al (US Patent 5482022). Aoki et al teaches that it is known in the prior art of batteryless engines for a microcomputer (ECU) to start an injection after the generator voltage has been established. In other words a fuel injection command is generated after the generator has reached a pre-determined voltage. An ignition system and an injection amount decision section are inherently included. See col. 2, lines 24+ and also col. 6, line 60 - col. 7, line 45. Also especially, col. 7, lines 30-34.

Allowable Subject Matter

3. Claims 6 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
